**Subject:** Microsoft Settlement

The Microsoft vs DOJ case has gone on long enough and wasted enough taxpayer money. I think and thought the case should have been dropped long ago. But, since that is not what happened, I implore you for a speedy resolution. It's time to end this lawsuit.

I believe Microsoft DOES have the interests of the consumers at heart and believe this company should be left to do what it does best - create software. Because of Microsoft technology many companies are able to run their businesses better and faster.

The DOJ should move on to more important matters.

Sincerely,  
Deborah Kaplan Clancy
